EDUCATION

Sabancı University, Istanbul

2016 – 2022 (%25 Scholarship)

Faculty of Engineering and Natural Sciences - Computer Science

Ayazağa Işık Highschool, Istanbul

2011 – 2016 (%100 Scholarship)

SUMMARY

Game developer with experience in Unity, gameplay systems, and UI/UX design, passionate about building engaging and polished player experiences. Known for being a motivated and positive teammate, quick to solve problems, and always eager to learn and adapt in fast-paced development environments.

EXPERIENCE

Hooligan Games – *Game Developer*

November 2024 – Current

Successfully contributed to and published a project alongside another developer, delivering engaging player experiences through intuitive interfaces and well-structured game mechanics. Skilled in problem-solving, collaboration, and optimizing performance to create polished, high-quality games.

- Designed and implemented interactive UI elements, menus, and HUDs to ensure a seamless player experience.
- Built core gameplay features and mechanics, focusing on player interactions, game progression, and ensuring smooth functionality.
- Implemented dynamic card behaviors, deck management, and upgrade systems to enhance strategic gameplay and progression.
- Developed *Save Money*, *Merge Brawlers*, *Aura Farmer* and *Double Strategy*, collaborating closely with other developers to build core mechanics, dynamic UI systems, and card upgrade functionality using Unity and C#.
- Represented the studio in meetings with publishers, presenting the game concept, vision, and design decisions to secure publishing partnerships.
- Developed grid-based systems and mechanics for the game Fort Royal, implemented Firebase Remote Config, integrated IAP, notifications and localization systems leveraging AI development tools.

Lost Panda Games – *Game Developer Intern*

June 2021 – November 2021

Demonstrated ability to work under pressure, collaborate effectively with team members, and troubleshoot issues encountered during development.

- Developed a 3D third-person coin-collecting game with three unique levels using Unity and C#, following structured tutorials and applying learned concepts.
- Built core gameplay systems including player movement, coin collection, and win conditions.
- Designed and implemented essential UI elements such as a main menu, pause menu, and level transition screens.
- Gained hands-on experience with Unity workflows and improved proficiency in game development fundamentals.

ACADEMIC PROJECTS

Graduation Project – *Sabanci University, 2022*

As a full stack developer, architected and implemented an educational website serving as a comprehensive syllabus platform. Leveraging **React** for the frontend, **Django** for the backend, and **MongoDB** for the database, while utilizing **Postman** for API testing, successfully managed a large-scale project while adeptly resolving encountered bugs.

OpenGL Game – *Sabanci University, 2021*

Developed a 3D game from the ground up using **OpenGL** in **C++**, incorporating advanced game development techniques, **design patterns** and **OOP**. Programmed collision detection, object and texture rendering, dynamic player and camera movement within a 3D environment.

Ray Tracing – *Sabanci University, 2021*

Utilized geometric computation and **vector algebra** to accurately simulate light behavior. Implemented antialiasing techniques to enhance image quality, ensuring smooth and realistic visual outputs. This project provided a deep understanding of the fundamental principles of light behavior and its interaction with various surfaces.

Internship Project – *Sabanci University, 2021*

Completed an internship at Lost Panda Games, where I developed a 3D platformer game with three levels using **Unity** and **C#**. Designed and implemented the HUD and UI, managed camera and player movement, and crafted immersive scenes.

E-Commerce Website – *Sabanci University, 2021*

Collaborated in a team of three to develop a basic stock image shopping website for a course project. Contributed to both frontend and backend development, enhancing coding skills in **JavaScript** and **Python**. Utilized project management methodologies with tools like **JIRA** and **Git** to facilitate **agile development** and effective teamwork.

Social Media App – *Sabanci University, 2021*

Collaborated with a team of five to develop a social mobile application using **Flutter** on **Android Studio**. Improved team working skills and coding collaboration, leveraging **Git** for version control. Gained proficiency in the **Dart** programming language throughout the project.

Website Design – *Sabanci University, 2020*

Designed and created a website on Wix focused on games and game analysis, enhancing visual design skills, creative thinking, and content creation. Emphasized effective layouts and color synergy to improve user experience.

Sabanci Campus Heat Map – *Sabanci University, 2018*

Analyzed and evaluated population data using software that monitors campus Wi-Fi usage by location to gain insights into crowd movements and choke points, with the goal of improving campus movement and accessibility.

PROGRAMMING & TECHNICAL SKILLS

Languages & Scripting:

C++, C#, JavaScript, TypeScript, Python, Dart, HTML/CSS

Frameworks & Libraries:

React, React Native, Node.js, Django, Basic Flutter

Game Development:

Unity (2D/3D), Game UI/UX, Gameplay Systems

Tools & Platforms:

Git & GitHub, JIRA, Trello, Postman, Basic Linux CLI, MongoDB, Claude

Concepts & Practices:

Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Debugging, Version Control, Agile Development

PROFESSIONAL SKILLS

- Professional Level English
- Strong problem-solving and communication skills
- Effective in team collaboration and independent work
- Quick to learn and adapt to new technologies
